

# **ASERSA Open Webinar Series**

## **16 June 2021**

Good morning, and good afternoon to all.

Welcome to webinar #8 of ASERSA.

Thank you for attending this new webinar of the Open Webinar Series 2021 of ASERSA.

The favorable welcome that our webinars have received during the past months has encouraged us to continue with the initiative of sharing and disseminating the most diverse projects intended to make water reclamation and reuse an essential element of water resources management.

# ASERSA Open Webinar Series

## 16 June 2021

All these webinars have been possible thanks to the continued support of our sponsor members:

- The Catalanian Water Agency (ACA)

- The Sanitation Agency of the Murcia Region (ESAMUR)

- The company SUEZ Spain

- The company Veolia Spain

as well as the support of all our regular members.

# **ASERSA Open Webinar Series**

## **16 June 2021**

Equally important has been the assistance and interest offered by so many friends, colleagues, and professionals, willing to share with all of us their knowledge and experience on how to implement and advance water reuse under the most diverse environmental, social and economic conditions.

# ASERSA Open Webinar Series

## 16 June 2021

Today's webinar features the contributions of three exceptional guests, who work in two very different environmental conditions,

**Jordi Martín-Alonso**, in charge of the Water Quality Management Unit at Aigües de Barcelona, where he coordinates water quality follow-up for drinking and wastewater treatment processes.

**Jordi Molist**, in charge of drinking water supply at the Catalan Water Agency, where he coordinates planning and management of the Catalanian Basin and the development of new drinking water and reclaimed water infrastructures.

**Antoni Munné**, in charge of water quality management, planning, and control at the Catalan Water Agency, where he leads the adaptation of the Catalanian Basin to the European Water Framework Directive.
