

ASERSA Open Webinar Series

24 marzo 2021

Good morning, good afternoon (and even good evening) to all.

Welcome to webinar #5 of the Open Webinar Series 2021.

Thank you very much for attending this new webinar from all over the world.

The great reception that our four previous webinars have received over the past year has encouraged us to continue with the initiative to share and disseminate the most diverse projects that are being carried out to make water reclamation and reuse a basic element of water resources management.

ASERSA Open Webinar Series

24 marzo 2021

To make it possible, we count on the unconditional assistance of our supporting members:

The Catalanian Water Agency (ACA).

The Entity of Sanitation and Purification of the Region of Murcia (ESAMUR)

The company SUEZ Spain

The company Veolia Spain

as well as with the support of all our members.

ASERSA Open Webinar Series

24 marzo 2021

But above all we count on the collaboration of so many friends, colleagues and professionals willing to share with all of us their knowledge and experiences on how to implement and carry out water reuse, under the most diverse environmental, social and economic conditions.

ASERSA Open Webinar Series

24 marzo 2021

Today's webinar features the contributions of two exceptional guests, who work in two very different environmental conditions, especially from the point of view of water resources, such as the Canary Islands, so affected by the semi-arid and even desert climate of the Sahara, and the Autonomous Community of Madrid, located in the center of the peninsula and affected by the peninsular continental climate.
